Respected HR ,

In my pursuit of new creative endeavours, I was excited to find the Full Stack Developer opportunity with your team. As a progressive professional with adequate experience, I believe that I can bring valuable contributions to your team.

Identifying innovative approaches and improved solutions to business challenges both motivate and drive me. Observation, inspiration, and determination are my foundation for success. My philosophy is that introducing fresh perspectives and new techniques allow businesses to evolve and grow.

Formerly in my Junior Full Stack Developer role, my successes have stemmed from essential skills. I have enhanced my motivation abilities and cultivated a reputation as a major contributor through time-management and innovation. I am a collaborative team player who is always searching for opportunities to impart valuable insights. With these qualities, I am able to facilitate positive change and impacting outcomes.

As you review my resume, you may notice a brief gap in my work experience. I resigned from my previous position to relocate across country to a new career opportunity. While managing the logistics of my move, I studied industry news, trends and events to keep my knowledge current. I am now settled and prepared to take the next steps in my career.

For a greater presentation of my background and qualifications, please review my attached resume. I am eager to speak with you and greatly appreciate your consideration.

Sincerely,
Samrood Jahan Puthiyamalikakkal
